2. WHAT IS “STEIN COIN” TOKEN

STEIN COIN is a new ecological blockchain generation replacing traditional payments with an exceptional way to consume, deliver and share your money, low fees and connected from your mobile, committed with environment, with instant and anonymous transactions.

Of course, STEIN COIN is a decentralized coin; there is no a bank neither government that controls. The application orders member smart solution to tender finance, with features like actual-time announcements, savings, financial IQ and mobile tap to pay performance.

Thanks to the divisible chains, we get an optimization of resources between nodes thanks to severability chains.

We have managed to do that a STEIN COIN transaction only includes 0'001% fee per transaction. It does not care if you are the seller or the buyer. For both of you, will be that.

STEIN COIN is created to access to a global payment network that enables global compliance of the STEIN COIN wallet around the world.

Another explication of crypto payment, our STEIN COIN digital local money account is an entrance to expanded cryptocurrency believes, associate it with entry to standard

economic assistance & new smart features on an elementary, the user-friendly stage.

STEIN COIN payments and transactions are really fast – less than a second!

The improvement of each transaction is about 60.000 TPS, what means that a core supports about 100 TPS.

STEIN COIN is powering and creating a New Ecological Blockchain Generation to deny peer to peer payment tracks among other things or priorities. Your privacy, our priority.

A peer-to-peer verification protocol that ensures that all miners only use renewable energy. It allows maximum confidence and verification of compliance, which is not

supported by a third party and keeps creating a clean crypto community.

3. OUR MISSION

Our mission at STEIN COIN is to become one of the most important cryptocurrencies and faster growing ICOs released.

STEIN COIN was created by experienced digital entrepreneurs who have a passion for, and experience in managing online platforms. Such experience includes the implementation of online marketing strategies, customer service, SEO, marketing and experts in finance and blockchain, all of which are supported by appropriate legal services.

Our proposal is to solve the issues identified in another cryptocurrencies operations and exchanges around the world.

Such solutions includes that STEIN COIN is a cryptocurrency or new ecological blockchain generation powering P2P (peer to peer) transactions, among other things.

STEIN COIN its accepted mostly all worldwide, restriction for countries (except legal judgements) without very low fees to payer neither debt collector.

Reduce commissions by removing the middlemen; which means to eliminate all indirect links between advertisers and publishers by applying smart contracts for all types of tracking, thereby increasing the economic efficiency of cooperation.

STEIN COIN will always be fully transparent; the Golden Rule: "Treat others the way you want to be treated."

4. ROADMAP

- FOUNDATION OF STEIN COIN

MARCH 2018

- WHITEPAPER RELEASED

JULY 2018

- PRE ICO LAUNCH

18th OCTOBER – 18th DECEMBER 2018
(+45% extra bonus token)

- ICO LAUNCH

22nd DECEMBER – 25th FEBRUARY 2019
(+25% extra bonus token)

- STEIN COIN

FEBRUARY 2019

During this period, ICO has already finished and we will be checking all payments are well revented. We will be distributing all your purchased tokens to your ERC-20 wallet immediately the ICO has ended.

- 15% FUNDS DONATED TO HEALTH CHARITIES

8. CURRENT LEGISLATION

Recently, regulatory bodies have expressed the need to regulate ICOs and exchanges. The Central Bank issued a report, assessing the risk to investors, stating that bodies that market this type of non-financial asset are not regulated by any monetary authority.

The Central Bank clarifies that virtual currencies should not be confused with electronic currencies or financial assets, and they should not be a risk to the National Financial System. This comment is important for the sector, as the Central Bank does not intend to implement 5. Release No. 31,379 / 2017, the Central Bank monetary policies or specific regulations on virtual currencies or on the platforms that market them.

This will keep the market self-regulated, adhering to its own rules and the movements of users.

The Securities and Exchange Commission (CVM) has also considered and issued relevant opinions, expressing that although they do not represent official regulations, they may share an official position on the topic in the near future.

The CVM has intensified its scrutiny of the platforms that participate in this type of market, interpreting ICOs "as public funding of resources, having as counterpart the issuance of virtual assets, also known as tokens or coins, to the investing public. Such virtual assets, depending on the economic context of their issuance and the rights granted to investors, may represent transferable securities, in accordance with art. 2 of Law 6,385 / 76."

The pertinent conclusion of the CVM's position is that projects and ICOs will be evaluated individually according to their market proposal. The CVM will classify ICOs according to the stance of its technical body. A crypto token is only defined as a 'security token' if it derives its value from an external, tradable asset, and this is where it becomes subject to federal securities regulations.

Failure to abide by these regulations could result in costly penalties and could threaten to derail a project.

Utility tokens, on the other hand, represent future access to a company's product or service, and this feature exempts them from federal laws governing securities.

STEIN COIN falls within this context because it will confer a varied number of benefits to its users, with tokens representing the right of access to its platform and the transaction of cryptocurrencies using its electronic engineering.

The CVM has not yet issued a definitive opinion on the regulation and the supply of this type of product. However, it is certain that if necessary, STEIN COIN will conform to the most recent provisions of national law, including compliance with what the CVM mandates for the circulation of this product.

10. DISCLAIMER OF LIABILITY

Taxpayers are advised to carefully read this document and to make an informed assessment of the associated risks.

1.2 The present Initial Coin Offering, commonly referred to by the acronym 'ICO', is not about the offer of securities or collective investment under the terms of STEIN COIN legislation. Therefore, it does not dispense registration with the Securities.

1.3 STEIN COIN (STCN) Tokens will be offered in the form of a Smart Contract ERC20, Ethereum technology. Given the nature of this technology, this contract cannot be changed once executed.

1.4 The Tokens will be issued according to the sequence of orders, until the expected hard cap is reached, or until the sale period ends. Any amount received after the upper hard cap limit is reached will be donated to health or medical charities.

1.5 When transferring funds to the ICO, transfers cannot be cancelled or refunded, except in the case outlined in item.

1.6 STEIN COIN is not a tax agent, and therefore the user is responsible for abiding by the relevant tax laws within their country.

1.7 This whitepaper consists of a project brochure, featuring the forecast of objectives, structure, strategic implementation and legal elements involved in this sector. This does not provide any guarantee to the user that all the

projections contained will be met, as they are dependent upon external market factors.

1.8 Any loss, damage, or disadvantage which the user may have or identify due to participation in the ICO is assumed and borne exclusively by the user.

1.9 Participants in this project understand that upon entering an ICO, they enter a high risk operation that may result in a loss of the amount spent. No information provided in this whitepaper or on the STEIN COIN website should be considered investment advice. STEIN COIN does not offer any of its users the option to buy or sell tokens as an investment.

1.10 The user is subject to the laws of the country in which he resides. Residents of the United States, Korea, China, Canada, New Zealand or another country that prohibits participation in ICO are not eligible to invest in STEIN COIN.

1.11 By participating in the ICO, the user declares that they understand, accept, and agree to all the rules determined, and choose to participate at their own discretion, without restrictions or limitations. STEIN COIN doesn't take charge in a bad misuse by the buyer.
